

## RECOMMENDED CAF UNIT TO PROTECT YOUR VINEYARDS

To protect your vineyards we recommend the Tri-Max 200 mobile units are skid loaded to easily transport to any building in danger. It is one of the large capacity SKIDS and is capable of producing a staggering 4000 gallons of finished foam product. The unit was engineered to fit in the back of a full size one-ton pick-up truck or a trailer. The finished foam is environmentally safe and biodegradable. For details please see the specifications for this model below.
